

Quadrille and SES unveil next-generation managed satellite services for video and OTT channels

Strategic partnership between the two companies has led to co-development of next-generation push video technologies that are integrated into SES's VOD platform

PARIS 14th/9/2017 — Quadrille, an independent software vendor and leader in supplying software solutions to deliver content over Satellite, Terrestrial or Cable, and SES, the world-leading satellite operator, have unveiled next-generation push video technologies that are fully integrated into SES's VOD platform.

Quadrille has been working with SES in a strategic partnership to identify requirements and to provide its highly innovative software suite and technology infrastructure for SES Video's new generation video-on-demand (VOD) everywhere managed service platform.

Leveraging its proven push technology for files (QuadriFast™) but also for OTT channels (QuadriLive™), Quadrille is one of the key components of SES's next-gen VOD platform.

SES's VOD platform provides an end-to-end solution with pre-integrated content management services.

New functionalities include the integration of linear events and the ability for TV viewers to press the start over button. The VOD platform is also hosted on much higher bandwidth which enables faster configurable content refresh rates.

Xavier Battas, CEO of Quadrille, says: "We are very proud to have co-developed these push technologies with SES Video and to incorporate our innovative technology into SES's next-gen VOD platform. Through this managed service platform, SES Video and Quadrille are extending the content arm and to reach everybody, everywhere. Our DNA has always been broadcast-centric, and this is a great achievement for our company and for our technical team. This partnership with SES is a major step forward for us and the best is yet to come."

About Quadrille (www.quadrille.fr)

Quadrille is a French Independent Software Vendor, leader in delivering any file content over any kind of Broadcast services.

Quadrille Platforms ingests and delivers not only VODs, Catch-up or flat files but also live files coming from OTT channels.

Quadrille has worldwide references in markets such as Entertainment, Education, Media, Telecommunication, Transportation, Public and Military.

The modular file transfer solution QuadriFast™ enables to target a multicast delivery of any content (VOD, Catch-up, files ...) on any device, anywhere in the world when QuadriLive™ enables the push of OTT live channels on smart devices.
